

Ensuring Software SuccessSM

Test & Release Management— Made Easy

Prioritize Testing Effort Based on Requirements’ Risk and Its Importance to Customers

Be confident that your software is release-ready. Plan, understand, and control test and release management activities across all your releases, builds, and sprints. Agile and waterfall development teams rely on QAComplete™ to help prioritize key test functions, account for risk, plan test coverage, control test execution, and report on results for better release decisions. Developers and QA professionals can share one tool to collaborate and resolve defects faster.

“Testers have increased productivity by 30-50 percent vs. executing test cases from Excel spreadsheets. The testers never lose their place in the test run, and the timer function provides valuable insight into how long it takes to execute a test run.”

—Robert Yahn, Scenario VPD

What’s Important to You	How QAComplete Helps
<p>Increase QA Team Efficiency</p>	<ul style="list-style-type: none"> ◆ Save time by managing manual and automated test assets centrally and by integrating with testing tools that automate regression and mundane testing ◆ Centralize your test library to store, reuse, and modify tests quickly from release to release without recreating test sets ◆ Quickly re-run tests under different operating systems and browsers ◆ Assess differences in planned versus actual coverage, adjust resource allocations on-the-fly, and prioritize high-risk areas
<p>Understand Test Coverage</p>	<ul style="list-style-type: none"> ◆ Eliminate insufficient or redundant testing with in-depth insight into requirements traceability, defect tracking, and test case status across releases ◆ Use drillable, at-a-glance views to confirm that requirements are met and evaluate release readiness ◆ Control and manage tests easily, even at the test-step level ◆ Capture testing metrics automatically for process improvements and regulatory requirements
<p>Lower Your TCO and Get a Quick ROI</p>	<ul style="list-style-type: none"> ◆ Save money and spend 20% of what HP Quality Center costs ◆ Avoid costly setup expenses, consultants and implementation nightmares ◆ Learn the product without spending tons, with CBT Training and free videos

QAComplete Pricing

Not all organizations are the same so our flexible pricing structure lets you choose what works for you now and lets you scale as your needs grow.

Choose Your License	In the Cloud (SaaS)	On-Premise (Perpetual)
Named ¹	\$399	\$899
Concurrent ²	\$549	\$1149

¹The named license means that the license is assigned to a person—only that person can use it.

²The concurrent license means that individuals can share a license, but only one person can access the application at a time. This is the most economical option for larger organizations where usage varies by team.

See For Yourself

- ◆ [See QAComplete in action](#) and watch short videos of the features you care most about.
- ◆ Read the Capers Jones White Paper—[Combining Inspections, Static Analysis and Testing to Achieve Defect Removal Efficiency Above 95 %](#).
- ◆ Sign up for a [one-on-one Q&A session](#) with our in-house testing expert using the link or scanning the code below.
