

# ZEPHYR QUEST

## TEST MANAGEMENT FOR ALL HEROES

Your quest, should you choose to accept it, is to find a test management tool worthy of legends. A tool to foster collaboration, speed up release frequency, and provide end-to-end visibility to everyone.

With this very guide you will fulfill your destiny.

Pick one option at every stage and collect the points to find the answer you seek. Choose wisely...

### Part 1

## Start Here

#### Step 1: Choose your team size

Small Agile teams	+1
Mid-size Agile teams	+20
Large Enterprise teams	+30

#### Step 2: Choose your experience

Mainly used spreadsheets for managing tests/no TM tooling	+1
Used an agile test management tool in Jira	+20
Used standalone, enterprise-wide test management tool	+30

#### Step 3: Choose your scope

Most of our tests (test cases, executions, etc.) are within a single Jira project	+1
Our test library has grown across multiple Jira projects	+20
Our test library is large and complex, and spans across the entire organization	+30

### Part 2

## The Quest

#### Reusability

I don't plan on using re-usable test library or reusability features

+1

I want to increase efficiency by reusing my tests with test data, parameters, and shared steps

+20

I want the flexibility to share tests across releases and multiple, global projects

+30

#### Reporting

Give me just the basics for visibility on my test executions, top defects, and traceability

+1

Give me even more ready-to-use reports on traceability, coverage, test effort

+20

Give me more control – I need highly configurable reports to meet complex visibility requirements

+30

#### Planning

I need lightweight, high-level test planning to oversee the testing effort

+15

I'm looking for advanced test planning with calendar view, and more

+30

#### Automation

I primarily focus on manual testing but also want to integrate with popular test automation and Cucumber/BDD frameworks

+15

Give me the ultimate flexibility in how I can run and manage automation – even from inside test management tool

+30

#### Performance

I want to keep our requirements inside Jira, and I'm not worried about potential impact on performance

+15

I want to keep our requirements separate from Jira as I'm concerned about performance at scale

+30

#### Security

I'm happy with Atlassian Marketplace provided security and privacy

+15

I need fine-grained permission controls and clear segregation of test data for regulatory reasons and audits

+50

#### Support

I'm happy with having standard 24/5 product support, or reach out to the Zephyr Community for help

+15

I expect highest level of service with additional onboarding and premium support

+30

### Part 3

## Complete the Quest

Add all the points you earned to reveal your Zephyr test management solution

1 - 120

121 - 230

231 - 320

SMARTBEAR  
Zephyr Squad

Quick-start your testing in Jira

- ✓ Test design
- ✓ Test executions
- ✓ Automation and integration with BDD and CI tools
- ✓ Single-project reporting

Start Free Trial

SMARTBEAR  
Zephyr Scale

Advance your testing in Jira

- ✓ Reusability-at-scale features
- ✓ Lightweight test planning
- ✓ Automation and integration with BDD and CI tools
- ✓ Cross-project reporting

Start Free Trial

SMARTBEAR  
Zephyr Enterprise

Achieve continuous testing agility in a standalone solution

- ✓ Bi-directional Jira integration
- ✓ Enterprise-grade test planning and auditing
- ✓ Flexible support for third-party automation frameworks
- ✓ Premium enterprise support
